

**UK** College of Arts  
and Sciences  
*Department of Biology*

With over 1300 biology majors, the department of biology is home to the largest undergraduate major on campus. Biology's updated curriculum provides 21st century instruction that focuses lower division students' training in bioinformatics, evolutionary thought, and systems approaches to biology. Upper division courses incorporate a broad foundation of core courses with opportunities for specialization within many biological subfields. Read more about the biology undergraduate program.
